DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a measuring probe for measuring high frequencies, classified in class 324, subclass 754.
 - II. Claims 9-20, drawn to an apparatus for coupling an electromagnetic wave between first co-planar spaced planar electrical conductor and a pair of spaced co-axial electrical conductors, classified in class 324, subclass 158.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination *such as the measuring probe for measuring high frequencies, wherein a solid dielectric mounting the co-planar conductor structure, the dielectric being arranged on the co-planar conductor structure; the dielectric being arranged on at least one side of the co-planar conductor structure in a central section of the probe so the dielectric is between and spaced from the co-axial cable end and the contact end. The subcombination has separate utility such as measuring the characteristic of wafer or semiconductor in high frequencies.*

Art Unit: 2829

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
